

# EVERY NAME INDEX

In general only the research compiled by me has been included in this every name index. The collection contains thousands of names in extracts and documents that are not indexed.

This collection was initially compiled for the exclusive use of my family. As it later became obvious how valuable it might be to other genealogists, the decision was made to create this index and attempt to disseminate the records as widely as possible. As a result many of the materials presented have additional information on collateral lines which is not included here. You are encouraged to investigate these sources further. Wherever possible data have been referenced to primary sources.

The first number following the entry in the index is the volume number; the second number is the page number. A page number listed as "0" refers to the primary pedigree chart at the beginning of the volume. For example 1:0 refers to the primary pedigree chart in Volume 1. Supplementary pedigree charts within the volume carry regular page numbers. Some names may appear more than once on the page.

## ABBREVIATIONS

gnu = given name unknown

su = surname unknown

w/o = wife of

h/o = husband of

mnu = maiden name unknown

nmn = no middle name

s/o = son of
